

Probate work is Financial

Probate estate administration is primarily about accounting for the assets and liabilities of the deceased estate. With some case management to assist.

Many people think that probate work is mainly case management or a workflow. And an Excel spreadsheet. And typing the estate accounts afresh. And manual completion of the tax forms.

This approach is cumbersome. It is time wasting. It is unprofitable. It is prone to errors. It is a risk to your firm.

Many of our customers are achieving a Gross Profit Margin in excess of 70%. So can you!
